****This message sent to you on behalf of Paul Croll, VP, Computer Society Technical & Conference Activities Board.****

Dear TC Chairs,

As many of you recall from the June Technical Activities Committee meeting, T&C Treasurer Frank Huebner put together an analysis and proposal for TC reinvestments. The Technical & Conference Activities Board is pleased to announce that the Computer Society has approved a reinvestment program for TC allocation, beginning with 2012. As a result, TCs will have the ability to reinvest surplus allocation for one additional year in order to fund new initiatives and expanded activities for their members. Details of this are explained below.

Allocation Reinvestment Program:
- TCs must have an approved allocation of $10K or more to be eligible.
- Allocation surplus for reinvestment will be the smaller of $10k or 50% of approved, but unspent funds.
- TCs are strongly recommended to use the reinvestment funds on new TC initiatives.
- TCs will have one year to use the reinvestment funds.

Reinvestment funds will be reviewed as part of the regular TC budget approval process. Specifically, at end of year x, staff will determine how much ($y) remains of the approved year-x budget. $y will be added to the approved TC budget for year x+1 by the T&C Board Treasurer. TC Chair will be informed about the TC's year x+1 approved budget including the year-x reinvestment.

Sincerely yours,
Paul

Paul R. Croll
